

Information for new members of the Natural Dye Study Group

Welcome to the Natural Dye Study Group.

This is a collaborative group that meets once a month to share our knowledge and experience with natural dyeing. Please be aware that this is not a class about natural dyeing. Each month we focus on a particular dye or other aspect of natural dyeing and test small samples.

If you are new to natural dyeing you may find the process and Chemistry a bit overwhelming and we recommend that you observe the first time and see if it's something you would like to pursue. We are very open to new members and also want to make the experience positive for first timers who do not have experience with the process. We recommend you check out some of the many resources available on line, in print and through classes. Local Cloth will be offering a quarterly class on the basics of Natural Dyeing which you may find helpful.

Please email me at joycetromba@gmail.com if you have any questions.
